

Raw Material Policy

Decided by Pär Skinnargård Director Wood Procurement, Rottneros AB
2022-10-13

Responsible wood procurement

Rottneros will actively work to ensure that forests are managed responsible through the responsible sourcing of wood raw material. All wood raw material used by Rottneros shall be sourced from responsibly managed forests and as a minimum meet FSC's standard for Controlled Wood.

Rottneros actively works to exclude wood war material originating from:

- Illegally harvested forests
- Forests where high conservation values are threatened by harvesting. In Sweden, this applies to any timber that comes from woodland key habitats that are harvested contrary to recommendations from the Swedish Forest Agency
- Forests that have been substantially converted to plantation or other forms of land use
- Forestry using genetically modified trees
- Forestry that breaches any of the core conventions of ILO in respect of forced and/or child labour, freedom of association and collective bargaining or discrimination and harassment
- Forests harvested in violation of traditional and human rights
- Sources that are not compliant with EUTR, the EU timber regulation

Rottneros is certified in accordance with FSC's and PEFC's international Chain of Custody standards
