### **Unplanned shutdown of the Vallvik Mill has a negative impact on production during the second quarter**

Production in the Vallvik Mill has been affected by an unplanned shutdown due to leakage within the recovery boiler. The problem is now resolved and production is back to normal.

The shutdown represents an estimated production loss of about 4,500 tonnes in the second quarter, corresponding to approximately 7.5 percent of mill's planned production for the quarter and about 4.5 percent of the Group's total planned production for the quarter.
